Comments reported to the City of Ashtabula

On December 15, 2016 a resident called to state that she thought it was a good idea to have sidewalks installed for school children and residents of the neighborhood. She did wish however that the sidewalk could be constructed of asphalt rather than concrete; it is better for walking. She wished that new sidewalks could be constructed in the area of Carpenter Road.

This is the only comment that was issued to the City of Ashtabula with respect to the Safe Routes to School Project.
